

2010 Public Report of Major League Baseball's Joint Drug Prevention and Treatment Program

This report covers the time from the beginning of the 2009-2010 Major League Baseball off-season to the end of the 2010 MLB post-season.

As per agreement between Major League Baseball and the Major League Baseball Players Association, the following report is specific to players who compose forty-man rosters for Major League Baseball clubs.

- 1) The number of drug tests that were collected and analyzed for performance enhancing substances and/or stimulants during the time listed above was 3747 tests.
- 2) Seventeen tests were reported by the testing laboratory for having an adverse analytical finding that resulted in discipline. The substances reported were as follows:

Performance Enhancing Substances (2)

Clomiphene (1)
Oxandrolone (1)

Stimulants (15)

Adderall (13)
Clobenzorex (1)
Phentermine (1)

- 3) 110 Therapeutic Use Exemptions were granted. The diagnoses were as follows:

Attention Deficit Disorder: 105
Hypertension: 2
Hypogonadism: 1
Narcolepsy: 1
Post-Concussion Syndrome: 1

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Bryan W. Smith". The signature is written in a cursive, flowing style.
