Physical Description: Soft body. Wide hips. Built sim to Livan Hernandez.

Injury/Medical Update: No knw injns.

Abilities: Loose, ez arm action. Ball jumps out of hand. Uses both sides of plate w/FB, most 93 w/short tail when down in zone. Nasty, late action SL. Good tilt, depth, pot out pitch. Attacks hitters.

Weaknesses: Overthrows at times, elevates ball. Doesn't posses a swing and miss FB, but able to move pitch around zone. Some feel for CHG, but needs further dev. Wt will be a futr concern.

Summation: HS kid w/live arm, pitchability. Soft body, but durable. Very confident in his ability. Fearless. Throws a lot of K's. Plus FB, SL is pot out pitch, working on CHG. Quality mid-rot starter.
